“Nick Redfern is the Brit with a knack for ferreting out all the dope on outrageous subjects.”

—Jim Marrs, author of *Alien Agenda*

Inside the Secrets of NASA

The National Aeronautics and Space Administration—NASA—was established on July 29, 1958. Ever since that day, NASA has been at the forefront of efforts to explore outer space, resulting in the Apollo missions to the moon, the Skylab space station, and today’s space shuttle.

But behind the open face of NASA, there is a much more mysterious world. NASA has been linked to a wealth of high-level cover-ups, including:

- Claims that the Apollo moon landings of 1969 to 1972 were faked as part of an effort to demonstrate military and technological superiority over the former Soviet Union.
- NASA’s alleged role in hiding the truth about the controversial Face on Mars—which many believe to be a carved structure, created in the remote past by long-extinct, indigenous Martians.
- Sensational comments from a NASA astronaut on the famous UFO crash at Roswell, New Mexico, in the summer of 1947.

Redfern also reveals Deep Throat-like NASA sources that have attempted to blow the lid on NASA’s most guarded secrets concerning the U.S. Government’s interactions with aliens. **The NASA Conspiracies** throws open all the doors that the Space Agency has kept closed for so long.

Nick Redfern works full time as an author, lecturer, and journalist. Redfern writes regularly for *UFO*, *Fate*, *Fortean Times*, and *Paranormal* magazines. His previous books include *Contactees*, *Memoirs of a Monster Hunter*, and *There’s Something in the Woods*. He has appeared on numerous television shows, including the History Channel’s *Monster Quest* and *UFO Hunters*; the National Geographic Channel’s *Paranatural*; and the SyFy Channel’s *Proof Positive*.
